---

SKILLS

JavaScript, React.js, HTML, CSS, Golang, SQLite, Git, Java, Spring Boot, PostgreSQL, Blender, Substance 3D Painter, MS Excel

PROJECTS

SMALL SHOP | JavaScript, React.js, HTML, CSS, Java, PostgreSQL, Spring Boot, Docker.
User authentication and authorization system utilizing JWT tokens, with distinct roles for admin and normal users, each having different access rights. The project features a PostgreSQL database for data management, react for frontend and Spring Boot for Backend.
GitHub Repo

SOCIAL MEDIA (teamwork project) | JavaScript, React.js, HTML, CSS, Golang, SQLite.
Facebook-like page, where logged in users can create groups, groupevents, posts, follow other users, edit profile and send live private messages to other users. Websocket is used to provide live messenger and notifications. All data is saved into SQL database.
GitHub Repo

BOMBERMAN (teamwork project) | JavaScript, React.js, HTML, CSS, Golang.
Multiplayer bomberman game, where players have to kill each other. Backend is written in Golang, using websocket for live updates. Project is built in the Social Media games section.
GitHub Repo

REAL-TIME-FORUM | JavaScript, HTML, CSS, Golang, SQLite
A single-page, full stack forum webpage, where registered users can post, comment and like/dislike. All data is stored in the database. Page also includes discord-like chat. Backend is written in Golang, using websocket for live private messages and notifications.
GitHub Repo

TETRIS | JavaScript, HTML, CSS
Tetris game with survival game mode. Player has only one minute, clearing rows gives extra time.
GitHub Repo
